

MaestroNano

MICRO-VOLUME SPECTROPHOTOMETER

MaestroNano is a specialized instrument for bio-chemical research, especially for micro-volume solution concentration measurement. It realizes a user-friendly interface, an accurate measurement, a competitive price and a stylish industrial design.

MaestroNano has a whole new technology of optical system design. There is NO optical fiber needed. Moreover, with the vertical slide design, the sample measuring area is more durable and stable.

MaestroNano has a reliable measurement range of concentration from 2 to 2000 (ng/ μ L) and has a great resistance for the interferences of ambient light to get more accurate measurement.
